About FDP:

LaTeX- A Tool for Technical Writing, Presentation and Scientific Research. Competence in technical writing holds great importance in the present era. It deals with specific knowledge, generally in the sphere of science and technology, and may be used in a wide variety of media such as journal/conference papers, thesis, project proposals, presentations, and many more. Expertise in drafting technical documents is an indispensable skill for all professionals as it helps to share their knowledge of technical subjects effectively in all domains of society and thus makes them competent in their professional careers. In this regard, LaTeX is a document typesetting system that is used to produce high quality scientific documents like articles, books, dissertations, technical reports, etc. This six days' training programme has been designed to provide a clear understanding of the basics of technical writing in the form of technical reports, journal papers, presentations etc., by using LaTeX.
