CHAPTER 1

1.1 INTRODUCTION OF THE STUDY

INTRODUCTION

1. AGRICULTURE IN INDIA

Agriculture is the most important sector of Indian economy. India ranks second worldwide in farm output. As per 2018, agriculture employed more than 50% of the Indian work force and contributed 17-18 % to country's GDP. The economic contribution of agriculture to India's GDP is steadily declining with the country's broad-based economic growth.

However two years of severe drought in 1965 and 1966 convinced India to its agricultural policy and that India could not rely on foreign aid and foreign imports for food security.

The rural economic transformation in our country has been a reality with the increased modernization and market expansion. But still today, farmers are always unsure of the yield they will reap. Considering this, there have been various plans and policies framed by the government for the betterment of this sector.

Looking up at any recent research or facts about farming in India. We can easily witness the contracting process in people's lifestyle indulged into this profession. Studying the prevailing dependency and sentiment of people in farming, we can easily end up realizing that problems are not properly realized and solutions offered are missing the targets without the proper intervention of government and authorities. Things are not going to trickle up positively for the agrarian population.

What is farmer producer company

A farmer producer company (FPC) can be formed by any 10 or more primary producers or by two or more producer institutions or by a contribution of both. An FPC is a hybrid between co-operative societies and private limited companies. The farmer producer companies, registered under the Indian Companies Act 2013 have democratic governance. Each producer or member has equal voting rights irrespective of the number of shares held.

Benefits of farmer producers company

The main aim of FPC is to ensure better income for the small producers through an organization of their own. Small producers do not have the volume individually (both inputs and produce) to get the benefits of economies of scale. Besides in agricultural marketing, there is a long chain of intermediaries who very offer work non-transparently leading to the situation where the producer receives only a small part of the value that the ultimate consumer pays. Through aggregation the primary producers can avail the benefit fo economies of scale. They will also have better bargaining power vis the bulk of buyers of produce and bulk suppliers of inputs.

All over India status of farmer producer company

The government of India has approved and launched a central sector scheme of formation and promotion of 10,000 farmers producers organizations (FPO) Agriculture engineer Vilas shinde has reaped a rich harvest. Sahyadri farms. The farmer producer company(FPCs) set by him in 2011 has grown to become the largest FPC in the country with a membership of 8000 famers and a turnover of rupees 300 crore.

About Sahyadri farms

Sahyadri is India's largest integrated platform for fruits and vegetables. Company via its unique inclusive partnership with farmers has built a strong capability overs the years in areas of primary processing of fruits and vegetables, semi – processed products like frozen and aseptic; processed products like tomato ketchup; fruit beverages and fruits jams; vegetables waste processing under and integrated zero discharge processing facility.

Statement of the study-

study To related Present study of financial performance analysis with special reference to Padmadeep farmers producers company, vita. Tal. Khanapur dist sangli. An Fpc is hybrid between Co-operative societies and private Limited companies registered under the Indian companies Act 2013 have democratic governance each producer or member has equal voting rights irrespective of the number of shares held.

A farmer producer company is thus a body corporate having an object that is one or all of the following:

Production, harvesting, procurement, gardening, pooling handling marketing, selling the export of primary produce of the members of goods or services for their benefit.

1.3 OBJECTIVES OF THE STUDY

1. To study and analyse the concept of data analysis
2. To study financial reports of the company.
3. To suggest appropriate suggestions and to draw a conclusion

1.4 RESEARCH METHODOLOGY

Research methodology is ways not systematically solve the research problem. The data and information required to conduct the study has been collected mainly from primary and secondary sources of data collection. The collected data is analyzed with the help of financial reports and preparing suitable tables.

1. Primary data

Primary data has been collected personally by visiting all the department of sugar factory. Finance and production etc.

2. Secondary Data

The secondary data has been collected from,

1. The financial reports of Padmadeep farmer producer company vita
2. Annual Reports and journals.

1.5 Need Importance of the study

This study report is useful to understand the financial performance of Padmadeep farmer producer company. And, report is important for analysis of data. This report is important for improve knowledge of researcher.

1.6. Scope of the study

This study is limited to Padmadeep farmer producer company vita For analysis and interpretation past three years data has been collected. i.e., 2019-20 to 2021- 22

1.7. Limitations of the study

1. Some Information is confidential that information may not be made available in the project.
2. The research conducted was only regarding the information available till the duration of the project.
3. Information is based on balance sheet figures, which has some inherent limitations.

1.8 CHAPTER SCHEME DESIGN

Introduction

This chapter explain information about farmer producer companies as well as the all over india status of farmer producer companies,, objectives, research methodology, importance ,scope and limitations.

2. Conceptual Framework

In this chapter explain the role of financial analysis, financing requirements of the firm, financial planning and control etc.

4. padmadeep farmer producer company profile.

This chapter explains the introduction of the padmadeep farmer producer company's structure and statistical information about the company structure and future plans of company.

4. Data Analysis and Interpretation.

In this chapter study about the financial analysis and data analysis from the last 3 years.

5. Findings Suggestions and Conclusion.

These chapters explain the findings, suggests, some instruction and at the end of the project attach the conclusion.

CHAPTER 2

THEREOTICAL BACKGROUND

Chapter 2

2.1 INTRODUCTION

The Role of Financial Analysis

Financial analysis provides a practical means of assessing the profitability of investments and their likely financial impact on potential investors including farmers, lenders, profit-oriented enterprises like processing industries and marketing agencies, whether these are in the public or private sectors. It forms an integral part of project design because technical, economic, financial, commercial, social and institutional aspects are all interrelated. Although the requirements for and the basic principles of financial analysis do not vary between different sectors, there are some distinct problems in agriculture, which deserve special treatment. These relate mainly to: (i) short-term fluctuations in prices of agricultural commodities more than the prices of non-farm products; and (ii) the long-run tendency for farm incomes to fall below urban incomes. Farm crops, which are mostly seasonal, are subject to variability in output and prices (and hence incomes) because of many factors completely beyond farmers' control weather, pests and diseases. In addition, primary commodities are more unstable than secondary ones, since they are less able to make the supply adjustments in the short run. The volume of production of tree crops like rubber, cocoa or tea is not much influenced in the short run by price. New planting can produce increased output only after several years, while once the tree is planted, it will go on yielding and it will be worth picking it so long as the price does not fall below the cost of collection and transport to the market. Accordingly if demand changes, there is little responsiveness on the supply side.

These special problems of agriculture have implications for the stability of the farmer's

income and his ability to invest. These problems are explored in the later chapters of this paper. For projects which do not generate revenue, such as education or research projects, financial analysis is concerned mainly with the sources and ascertaining the adequacy of funds for starting and maintaining the activity.

Purposes of Financial Analysis

Financial analysis is essentially undertaken for the following purposes:

- (a) to determine the financial viability of a project or an enterprise;
- (b) to assess the adequacy of a financing plan for a new project or a continuing business;
- (c) to advise on methods of improving the viability of a project.

Financial viability. The concept of financial viability has two dimensions -

The financial profitability and solvency of the existing operations of an enterprise, and the viability of a new project or enterprise. For a continuing enterprise, financial success would mean an ability to generate enough revenue to meet all financial obligations on a timely basis and command an adequate level of working capital for continued operations. Normally it also implies an ability to earn a reasonable rate of return on capital employed. The extent of success is ascertained by a review of its financial structure, liquidity trends, and profitability over time. For a new project, the main objective of the analysis is to demonstrate that the financial cash flows expected to be generated by it are attractive to the prospective investors, inducing them to contribute equity funds to the particular project rather than to employ them elsewhere. The analyses on which such judgements can be based are the internal rate of return (IRR) and the net present value (NPV). An investor would be interested in the IRR after tax which he would compare with returns from alternative investment opportunities at similar risk levels before committing funds to a particular project. If the IRR after tax of the project is greater than the cost of capital, it can be concluded that the project is viable. It must be emphasised that this will only be so if the machinery for the recovery of funds is appropriate and the terms of repayment can be adjusted to take any problems of phasing into account. IRR does not provide any information on the requirements for phasing, short-term bridging finance or grace periods on the loan required to accommodate delayed benefits. This leads us to the next objective of financial analysis.

Financing plan.

The investment expenditures, including the incremental working capital needs of a project/enterprise, will have to be met on a timely basis and at a minimum cost. In drawing up the financing plan, consideration will have to be given to the various types of capital and to the

most effective structure, both of which would be coordinated to satisfy the financial requirements of the business. These requirements are to be ascertained by careful budgeting to avoid extremes of over-capitalization or under-capitalization. In a continuing business where a budgetary control system is in operation, the forecasting of requirements should present no difficulty. For new projects, more has to be left to conjecture. Not only must costs be estimated but revenue is dependent on demand, which, in turn, is influenced by the state of the domestic economy, both of which lie largely outside the control of the enterprise. In both new and existing businesses, funds may be raised from external sources but in a continuing business, internal resources can be mobilized by ploughing back profits.

CHAPTER NO 3

PROFILE OF THE COMPANY

PADMADEEP FARMER PRODUCER COMPANY, VITA

CHAPTER NO.	TITLE
3.1	HISTORY
3.2	VISION
3.3	OBJECTIVE OF COMPANY
3.4	SOURCES OF FUND
3.5	SWOT ANALYSIS

3.1 HISTORY

This padmadeep farmer producer company, vita has been established in 2015 by Kishor Babar. At starting he had not the required money for even raising the capital. He started raising funds by share. This company mainly deals with fruits farmers. Giving them fertilizers and taking their fruits and by selling the goods at fair price at local as well as out of india also. Padmadeep farmer producer company, vita exports their fruits at Russia, dubai and uk market.

vision

1.2 To hire abroad market.

To sold farmer products at good price.

Our vision is that giving farmers reasonable rates by cancelling all mediators.

OBJECTIVE OF THE COMPANY

To increase sale and production of farmers products.

To get fair distribution of gains of productivity among the growers, workers and consumers.

To solve the problem in agricultural sector.

SOURCES OF FUNDS

Fund may raise form the following sources

1.By Issue of Shares

2.By other liabilities, provisions, bank.

3.5 SWOT Analysis.

SWOT analysis means strength, weakness, opportunity and threats of the factory. The factory how gets the opportunity, what are the strength of the sugar factory.

1. Strengths

1. Growth in working capital.

2. Strong Revenue Growth.

3. Good Relation with Others

2. Weaknesses

1. Workforce Diversity

2. Extensive Govt. Rules.

3. Opportunities.

1. Low Competition

2. E- Commerce

3. Business Expansion

4. New Environmental Policy

5. Population

CHAPTER 4

DATA ANALYSIS AND INTERPRETATION

SR.NO.	TITLE
4.1	INTRODUCTION
4.2	DATA ANALYSIS AND INTERPRETATION

CHAPTER 4

DATA ANALYSIS AND INTERPRETATION

4.1 INTRODUCTION

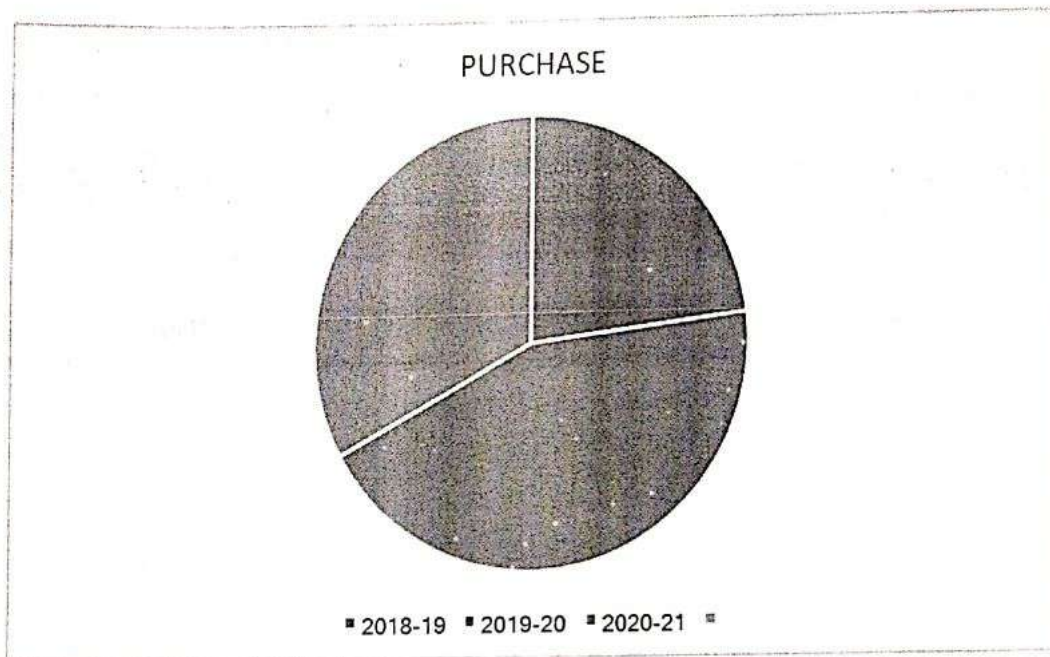

In this chapter the analysed data and interpretation shows with the help of tables, graphs and diagrams which is prepared from collective data i.e from primary data. The whole study of this project is based on this chapter the interpretation of each analysed data is presented as below in table.

4.2 DATA ANALYSIS

For the purpose of analysis of data, researcher has used various statistical as well analytical tools like tabulations, percentage, and diagram with the help of annual reports analysis. So after collection of data the next and the most important step in analysis of data.

4.2.1 PURCHASE OF PRODUCTS

YEAR	PURCHASE	PERCENTAGE
2018-19	67,02,401	23%
2019-20	1,24,21,688	44%
2020-2021	89,32,963	33%
TOTAL	28,05,7,052	100%

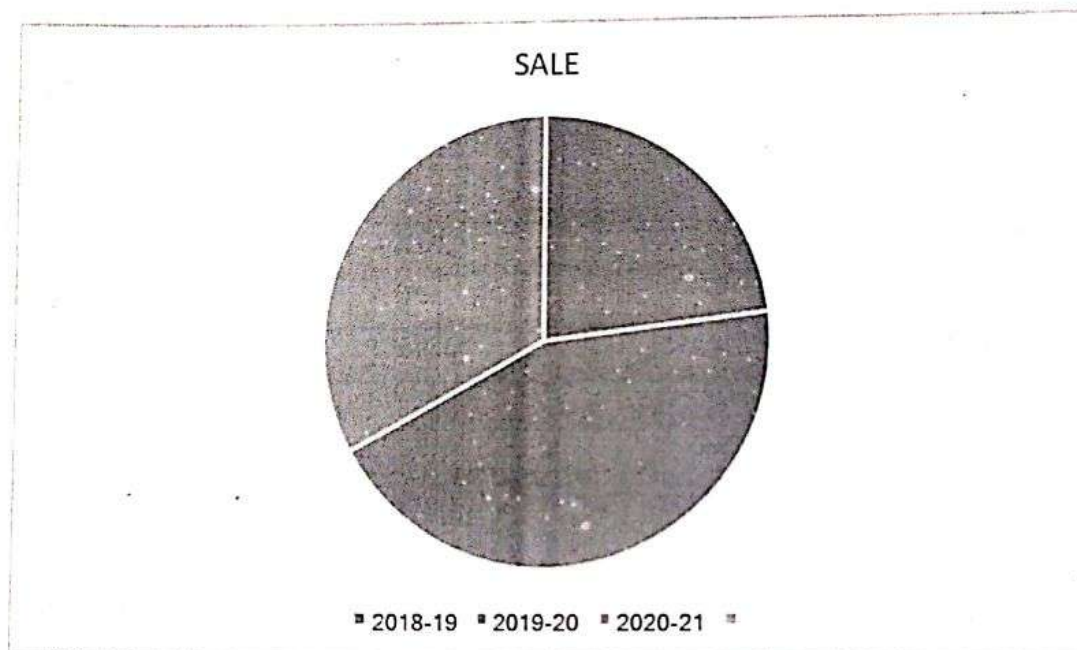

INTERPRETATION

The above table shows purchase of products 2018-19 to 2020-21. The highest purchase of products Rs. 1,24,21,688 and percentage 44% of year from 2019-20. But decrease in the year 2020-21 upto Rs. 89,32,963 & percentage 33%.

4.2.2 SALE OF PRODUCTS

Year	Sales	Percentage %
2018-19	71,88,556	23%
2019-20	1,32,87,573	44%
2020-21	96,86,744	33%
total	30,26,2,873	100%

INTERPRETATION

The above table shows sale of products 2018-19 to 2020-21. The highest sale of products Rs. 1,32,87,573 and percentage 44% year from 2019-20. But decrease in the year 2020-21 Rs. 96,86744 and percentage 33%.

4.2.3 INCOME AND EXPENDITURE ACCOUNT
FOR THE YEAR 2018-19, 2019-20 AND 2020-21

PARTICULARS	2018-19	2019-20	2019-20
INCOME			
SALES ACCOUNT	71,88,556	13287573	9686744
DIRECT INCOME			
CLOSING STOCK	1534781	1686130	1445320
GROSS PROFIT b/f	389575	686584	512970
INDIRECT INCOME	239140	35494	31515
TOTAL	628716	722078	544485
EXPENDITURE			
OPENING STOCK	1567260	1815310	1686130
PURCHASE ACCOUNT	6702401	12421688	8932963
DIRECT EXPENSES	64100	50120	
GROSS PROFITc/o	389575	686584	512970
INDIRECT EXPENCES			
ACCOUNTIG CHARGES	10000	6000	6000
AUDIT FEES, BANK COMMISSION	47809	32279	47251
DEPRECIATION	37543	28230	24560
ADVERTISEMENT, PRINTING AND STATIONERY	7958	9630	390
INSPECTION	3125	800	5836

CHARGES		7900	
LIGHT BILL EXP, MISC. EXP.	57053	48190	
SALARY EXP	171203	212070	81195
TELEPHONE BILL, VAT, AUDIT FEES	13987	15427	4416
NET PROFIT	280037	347113	356385
TOTAL	628716	722078	544485

INTERPRETATION

Above table shows that Income & Expenditure of Padmadeep farmer producer company vita. increase the year 2019-20 of Rs. 7,22,078 Maximum expenses spend by Desai Fertilizer on Depreciation of Assets year 2018-19 ie Rs. 37,543 However expenses on Salaries are highest doring the year 2019-20 Rs. 1,74,560 Net Profit increase up to 3.56.385 in the year 2020-21.

Following table shows balance sheet of padmadeep farmer producer company, vita

For the year 2018-19, 2019-20, 2020-21

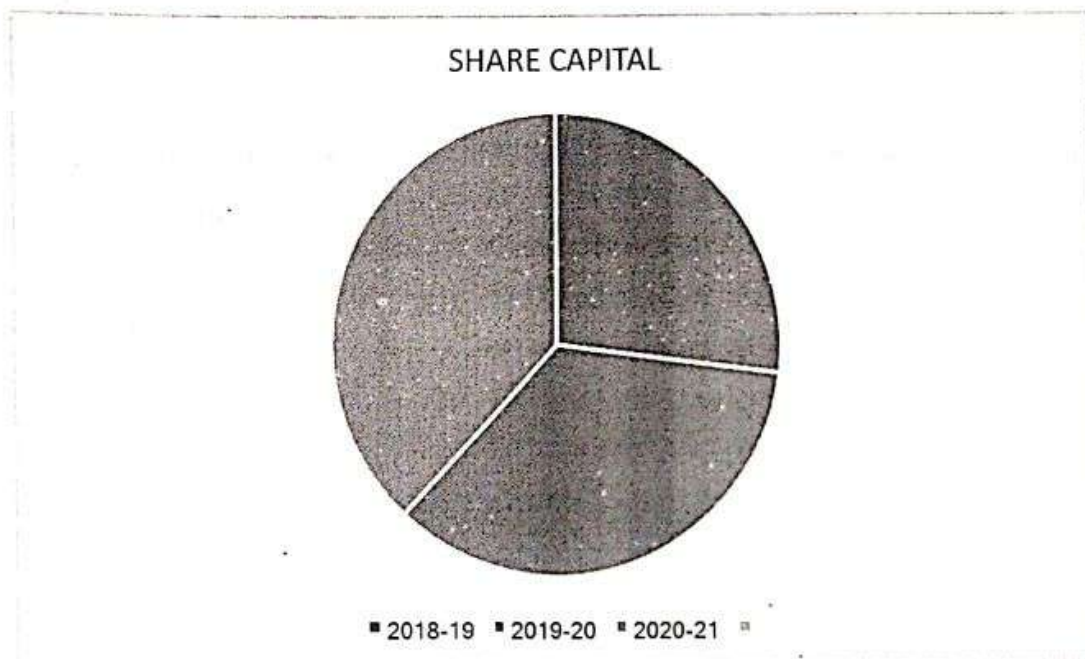

LIABILITIES	2018-19	2019-20	2020-21
Capital account	2303982	2923764	3187807
Loans	176963	438518	380034
Current liabilities	1571377	1081899	5290217
Suspense account			
Total	4052323	4444181	8858060
ASSETS			
Fixed assets	258740	197996	3241061
Investment	448779	709597	830132
Current assets	3344804	3536587	4786867
Total	4052323	4444181	8858060

INTERPRETATION

Above table shows indicated balance sheet of padmadeep farmer producer company, vita over the years. Current liabilities are highest during years. However current assets are highest during the year.

4.2.5 THE STUDY OF FINANCIAL POSITION

SHARE CAPITAL

The above table shows financial position of share capital in 2018-19 to 2020-21. Increase share capital of below last two years.

4.2.6 THE STUDY OF FINANCIAL POSITION

NET PROFIT

YEAR	NET PROFIT	PERCENTAGE
2018-19	280037	29%
2019-20	347113	35%
2020-21	356385	36%
TOTAL	983535	100%

INTERPRETATION

The above table shows financial position of net profit in 2018-19 to 2020-21 increase in net profit for below last 2 years.

CHAPTER 5

CONCLUSIONS AND FINDINGS

SR.NO	TITLE
5.1	INTRODUCTION
5.2	SUGGETIONS AND FINDINGS
5.3	CONCLUSION

5.1 introduction

The chapter is study of summary of project report. Means this chapter indicates concluding part of the study and suggestions if any crafted during the research. This chapter is mainly based on data analysis and interpretation of data. The conclusions and suggestions are as follows.

5.2 suggestions

1. the padmadeep farmer producer company has built their own business.
2. this firm should start for other farmers.
3. try to give fast and reliable services to the members.
4. adequate storage facilities which can minimize the product spoiling.
5. necessary knowledge should be given to farmers regarding to use of products.

5.3 CONCLUSION

Through the whole study data analysis and interpretation, researcher concludes that maximum number of customers is satisfied with the facilities of Padmadeep farmer producer company, via this service center to farmers in village as well as its near rural area.
